

## OUR SERVICES

We focus on providing a comprehensive energy solution (renewable energy) for any kind of infrastructures which aims to achieve operational cost efficiency. Supporting with technical experts and national-wide competencies, we are confident in delivering excellent solution.

1

**Power System Planning,  
Design & Installation**

4

**Managed Electrical System**  
(Panels, Wiring, Grounding)

2

**Integrated System  
Monitoring**

5

**Service Operation**  
(Preventive, Corrective)

3

**Managed Backup System**  
(Battery, Rectifier, UPS)

6

**Managed Power Plant**  
(Diesel Engine, Trafo, Cooling System, Refuelling)

## OFF GRID SOLUTION

We deliver an innovative and efficient energy solution for off-grid site by combining technical solution (such as PV, Li-Battery, Monitoring System, Genset, etc) with excellent operation and monitoring system.

### Benefit & Advantage

1

#### Low Cost

The solution provides cost savings and optimizes service performance

2

#### Fast Implementation

The solution ensures fast implementation which supported by new concept of design, well-managed distribution and excellent logistic management.

3

#### Excellent Service Operation

The solution ensures the excellent system performance which managed by experienced engineer teams and field technical experts.

4

#### Availability Improvement

The solution ensures the improvement of availability performance.

## ON GRID SOLUTION

We deliver all activities of managed service for on-grid facility (infrastructure facility that connected to power plant) including electricity design & planning, installation, electric management, genset maintenance, and power system maintenance.

### Benefit & Advantage

1

#### Low Cost

The solution provides cost savings and optimizes service performance

2

#### Customer will Focus On Their Core Business

The solution manages the customers' power system, thus allowing them to focus on their core business.

3

#### Excellent Service Operation

The solution ensures the excellent system performance which managed by experienced engineer teams and field technical experts.

4

#### Performance Improvement

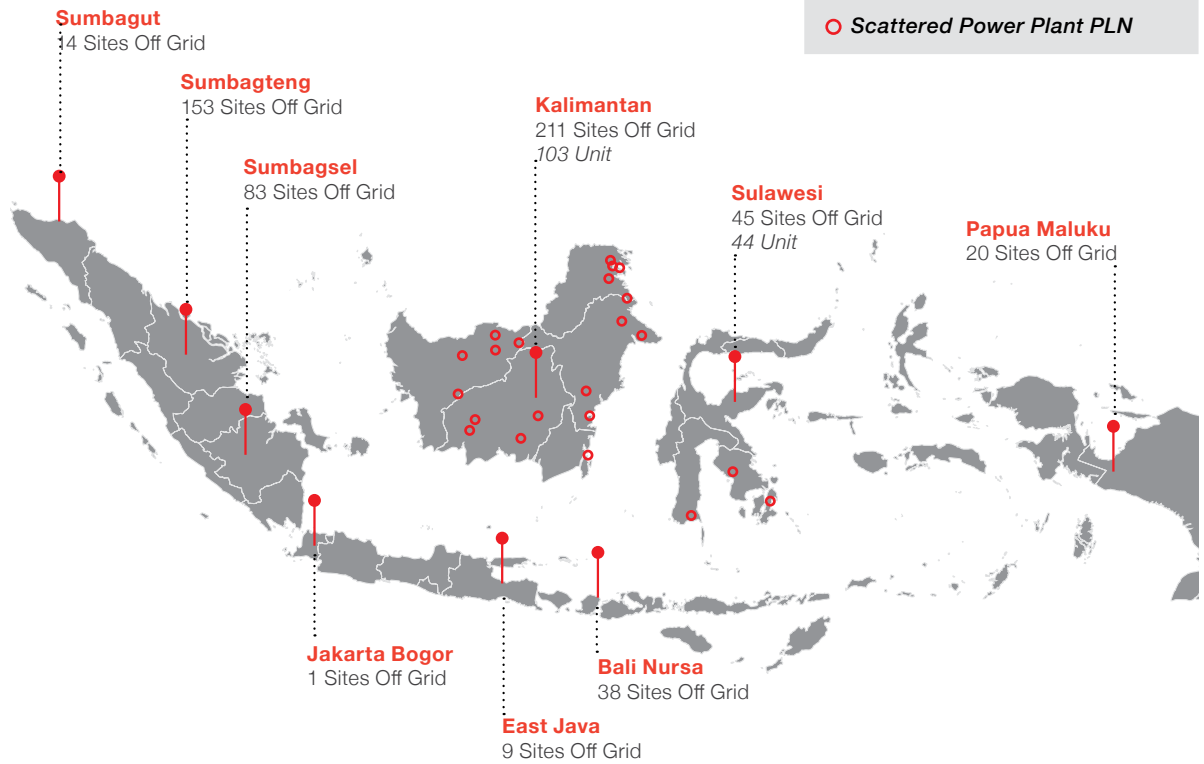

The solution ensures the improvement of power system performance.

## OUR CUSTOMERS

## PROJECT REFERENCES

- Off Grid Maintenance
- Scattered Power Plant PLN

Off Grid Managed Energy Service	Power Plant Deployment & LTSA
574 Sites	147 Units

Telkominfra successfully delivered power plant across scattered area and awarded in 2017
